PROJECTS

MEDJOURNAL

FRONT-END CAPSTONE
HTML | CSS | JAVASCRIPT | REACT | CHART.JS

MedJournal is a mobile-focused web application designed for users to easily access and log medical details in one convenient location.

- Users record health data in forms created using React.js
- Data from the forms is dynamically populated into charts with the use of Chart.js
- Each data-point is able to be edited and deleted from an on-screen list
- Meals and Medication can be recorded using forms created using React.js
- Medications toggle between "Taken" and "Upcoming" Lists recording a timestamp
- All charts can be viewed in the "Profile View" to give an overview
- Styled with CSS

JOBSEARCH

BACK-END CAPSTONE
C# | ASP.NET | MVC | ENTITY | BOOTSTRAP

JobSearch is a web application designed for companies to post job opening and applicants to search and apply directly to those jobs

- Companies and Applicants can log in and register through unique razor pages
- Companies can create job posts with full CRUD
- Applicants can search through available posts using extensive search features
- Applicants can modify profile info and upload a resume
- Applicants can one-click apply to jobs
- Companies can see pending applicants and accept or decline
- Applicants can see a list of all pending applications
- Styled with Bootstrap

EDUCATION

SOFTWARE DEVELOPMENT CERTIFICATE
NASHVILLE SOFTWARE SCHOOL

STUDIED MOLECULAR BIOLOGY
LIPSCOMB UNIVERSITY | 2011 - 2014

PROFILE

Born and raised in middle Tennessee, I began my college career at David Lipscomb University. After several years of soul-searching, I started teaching music to high school students locally. Ironically, it was one of those students who led me to Nashville Software School and, ultimately, my love of coding.

I decided to try out a coding "jumpstart" at NSS, and I was immediately hooked. Coding has been a non-stop journey of wondrous new endeavors, ambitious challenges to overcome, and marvelous discoveries to uncover. I've learned that the world of coding is filled with a plethora of new things to discover, which excites me to no end!

EXPERIENCE

JUNIOR FULL-STACK SOFTWARE DEVELOPER

NASHVILLE SOFTWARE SCHOOL | NOV 2019 - MAY 2020

Intensive full-time 6 month software development program learning full-stack technologies through the creation of applications individually and in the group setting.

- Hands on application and experience with HTML, CSS, JavaScript, React, C#/.NET
- Built browser-based, full-stack applications
- Utilized GitHub for source code version control and collaboration
- Use and creation of multiple API's using JSON Server
- Working with SCRUM methodology for team projects

NASHVILLE SOFTWARE SCHOOL PROJECTS

NUTSHELL

- Utilized JavaScript, HTML, CSS, & Internal Database using JSON-Server
- Group project with three teammates building a social media like application
- Individual role was to create an events list displaying upcoming events
- Users had chatroom functionality and ability to add/remove friends
- Post and view articles and events based on friends list
- Create a task list, which toggles between complete and to-do lists
